October 17, 1995

Mr. Steve Gordon, Project Manager  
ESA  
301 Brannan Street, Suite 200  
San Francisco, California 94107-1811

Dear Steve:

As we discussed I am sending you the worksheets on the LOS and V/C calculations done on Route 127 back in 1987. As you will see the LOS calculated is A and B for most segments. The concept LOS for Route 127 is C, and at the projected annual growth of 1% (based on historical growth trends), your observation that LOS C will not be exceeded is correct. I appreciate you running down the calculations using the 1995 Highway Capacity Manual and comparing the variances with the 1985 methodologies. I trust your professional judgment on which method to use for the Route 127 Route Concept Report update you are doing under contract with the County.

Dennis Manning has just received a compilation of the traffic counts we have been collecting since December. He will be forwarding this information to you soon. If I can be of further assistance please let me know.

Sincerely,

F. KATY WALTON, Chief  
Transportation Planning & Public Transportation
